

Church Health Consulting

Reaching Your Church's Potential

Proven Success

- 85 percent of churches completing three or more cycles of NCD (over a span of 2 to 2 1/2 years) have experienced increases in both the quality of their effectiveness and the quantity of people participating in worship.
- The average quality in these churches (measured by an index level for each of the eight quality characteristics) has increased by six points over an average of a 31 month period
- Their growth rate increased by 51%. In other words, if the church had been growing by ten people per year before beginning the process, that number would now increase to 15 people per year.
- Churches working with an outside coach have experienced even greater improvements.

"It's not about church growth,
it's about church health."

Pricing:

1 year package includes the following:

- NCD Overview Training Day *
- NCD Survey w/ Report
- Strategic Planning Retreat *
- On-going Coaching (9 Sessions)

These results do not represent a few select success stories. Rather, these are the average results of all the churches that have completed three or more surveys. This includes those who have experienced overwhelming success as well as those who have struggled or failed.

\$3,000.00

*Pricing does not include travel expenses

*Custom packages are available upon request

LEGACYCOACHING

Creating Change That Impacts the Future of Life and Ministry

Church Health Consulting

ARE YOU READY FOR CHANGE THAT MAKES A DIFFERENCE?

- More Growth?
- Greater Purpose?
- Increased Productivity?
- Inspired Vision?
- Empowered Leaders?

natural church development....

.... health produces growth

Natural Church Development (NCD) is a powerful process for assessing the health, strengths, and weaknesses of your church, then developing and implementing an action plan for improving church health by removing limiting factors. NCD has the greatest impact when it is approached as a long-term process for continuous improvement.

Natural Church Development grew out of what is probably the largest global study of church growth ever conducted.

The NCD process involves identifying barriers to healthy growth and removing them, trusting the life of the Spirit within the healthy church to produce the growth.

- **Step 1—Prepare:** Introduce NCD to church leadership; Evaluate readiness of church; Recruit Church Health Team and Prayer Team
- **Step 2—Diagnose:** Complete NCD Survey; Determine minimum factor
- **Step 3—Plan:** Action Planning Retreat; Strategic Plan, SMART Goals, and Action Steps determined
- **Step 4—Implement:** Initiate plan with accountability; Address mid-course obstacles; On-going coaching
- **Step 5—Evaluate:** Review process; Evaluate current health; schedule new survey

“The focus of my letter wasn't on punishing the offender but on getting you to take responsibility for the health of the church.”

—2 Corinthians 2:9
The Message

eight signs of a
healthy church

• *Empowering Leadership*

• *Gift-Based Ministry*
